

# MAUREEN HERNÁNDEZ, MSc

Senior Software Engineer · Technical Lead · Engineering Manager  
Columbus, OH · hernandezgmaureenp@gmail.com · linkedin.com/in/maureenhernandez

## SUMMARY

Senior engineer with 10+ years across FinTech and e-commerce, with prior management experience leading teams of up to 20, including mentoring engineers through senior-to-staff promotions. Moved to an IC track at Upstart to deepen technical credibility in ML-driven lending systems, where I architect high-throughput Auto Retail platforms and consistently lead multi-team projects, own team operations during transitions, and produce strategic analysis that informs business decisions. MSc in Management of Technology. Now seeking to return to engineering leadership at a higher level.

## CORE EXPERTISE

**Architecture:** Hexagonal/DDD, Nx monorepos, React, Nest.js microservices · **Cloud:** AWS (EKS, Fargate, RDS), Docker/K8s, CI/CD · **Data:** PostgreSQL, Databricks, dbt, Datadog · **AI/ML:** ML model operationalization, data pipelines, Claude API, Next.js · **Leadership:** Agile, TDD, cross-functional delivery, stakeholder management

## PROFESSIONAL EXPERIENCE

**Senior Software Engineer** · Upstart (NASDAQ: UPST)Columbus, OH | May 2021 – Present

*Promoted to L5 (Senior) in early 2025. Recognized for leading multi-team initiatives beyond IC scope.*

- Led 4-engineer team on True30 amortization — 3-month, 85-ticket flagship project aligning payment calculations with dealer standards, unblocking 40+ dealership rooftop acquisitions.
- Led RouteOne integration (2 engineers): delivered on time, fully tested, backward-compatible; zero regressions post-release.
- Led Out-of-State Lending (2 engineers), opening Auto Retail Lending to 10–40% of previously ineligible deals.
- Stepped up as interim team owner during manager transition; self-initiated the email errors epic and drove resolution — recognized by senior leadership for autonomous ownership.
- Incident commander on Origin-828 post-launch; drove definitional alignment across the full Auto org. Recognized at the director level for execution.
- Increased ARL funnel conversion +9.6% via vehicle valuation logic fix; +2.7% approvals, +6.7% rate acceptance downstream.
- Architected DAPI retry system, eliminating 1,000+ end-user errors/month; pivoted scope cleanly on shifting priorities.
- Improved CI/CD pipeline release times 80% (1,000+ min/month saved) through parallelization — self-initiated.
- Proposed VIN-based email reuse concept — adopted as foundational architecture for the shipped Email Reuse product. Separately won a company hackathon with a self-driven product growth idea.
- Compiled competitive lender APR/fee analysis that directly unblocked strategic decisions for VP-level leadership. Built data pipelines for ML model training: integrated Chrome Data into CDC for model 10.0.3, partnering with ML engineers to validate model behavior.

**Engineering Consultant** · IndiciusRemote | Oct 2020 – 2024

- Filled capability gaps via subcontracting; recruited and directed contract engineering squads. 100% client retention, 100% proposal win rate (3/3 engagements).

**Engineering Department Manager** · Raised RealRemote | Jun – Sep 2020

- Managed 5 engineers + DevOps; led Lerna monorepo migration, cutting release cycles 75% and billing routines 50%. Delivery velocity enabled the company's acquisition by OnceUponAFarm.

**Sr. Engineering Project Manager** · Cognizant Softvision. Buenos Aires | Jun 2019 – Jun 2020

- Managed 4 agile teams (~20 engineers) for MuleSoft and Mozilla; delivered 20+ connector releases; introduced remote QA lab automation.
- Mentored 2–3 engineers through career growth, including one L5→L6 promotion on the MuleSoft team — provided technical guidance, sponsored stretch assignments, and supported promotion case.

**Executive Managing Director** · Pixel2HTMLLatam Remote | May 2018 – Jun 2019

- Oversaw ~100 web projects with >90% outstanding client ratings; introduced CI/CD and serverless deployment practices.

## EDUCATION

M.Sc. Business & Technology — Universidad de San Andrés, Buenos Aires2024

*Thesis: Intelligent Management of Software Product Requirements*

B.S. Systems Engineering — Universidad de Los Andes, Venezuela2016

## SIDE PROJECTS

Mau's Tools — LLM-powered SaaS suite (Claude API, Next.js 14, Vercel)2025 – Present

## CERTIFICATIONS & PUBLICATION

Certified Scrum Master (SMI) · Cisco CCNA · edX: Data Science, Linux LFS101x, Statistical Thinking · UX Design (Coursera)

*Co-author:* IGF: un espacio de conversación plural, global y humanista — UN Internet Governance Forum, 2017
